SUMMARY

AI Engineer with 3.5+ years building agentic AI systems, MCP servers, and enterprise automation. Currently leading IVR automation at EY; previously drove mainframe modernization at Accenture, boosting throughput by 25% and cutting technical debt by 35%.

SKILLS

PROGRAMMING

Python • TypeScript • SQL • JavaScript
Java • COBOL

AI/ML

GenAI • LLMs • AI Agents
RAG • MCP • NLP
Transformers • PyTorch • LangChain

WEB & FRAMEWORKS

FastAPI • ReactJS • Node.js
Spring Boot • Copilot Studio

CLOUD & DEVOPS

Docker • Kubernetes • Git
REST APIs • MongoDB

CERTIFICATIONS

HUGGING FACE

AI Agents Course (Jun 2025)
Fundamentals of MCP (Jun 2025)

NVIDIA

Getting Started with Deep Learning

DEEP LEARNING.AI

Pair Programming with LLMs

MONGODB

MongoDB SI Architect (Jan 2025)

EXPERIENCE

EY (ERNST & YOUNG) | ASSISTANT MANAGER – AI ENGINEERING

Feb 2026 – Present | Kolkata, India

- Leading a pod of engineers building AI-powered IVR agents using Microsoft Copilot Studio and GPT Realtime API to automate call center operations for a leading pharmaceutical client (50K+ employees).
- Architecting agentic workflows with real-time LLM inference for voice-based automation; presenting solution architecture to client stakeholders.
- Designing conversational AI solutions targeting 40% reduction in manual call handling across enterprise support channels.

ACCENTURE | SOFTWARE ENGINEER (ANALYST)

Nov 2024 – Feb 2026 | Kolkata, India

- Built LLM-powered AI agents (LangChain) for legacy codebase analysis serving a team of 40+ engineers across 3 client accounts, boosting throughput by 25%.
- Deployed MCP-compliant automation pipeline to production handling 10K+ API calls/day with 99.5% uptime.
- Led FastAPI-driven API-fication of legacy systems, increasing interoperability by 30%.
- Designed reverse-engineering tools reducing manual modernization effort by 40%.

ACCENTURE | ASSOCIATE SOFTWARE ENGINEER

Oct 2022 – Nov 2024 | Bengaluru, India

- Contributed to mainframe modernization for Fortune 500 enterprise clients using Python, COBOL, and Java, reducing legacy technical debt by 35%.
- Mentored 2 junior developers on AI-driven transformation workflows and code review best practices.

MINDTREE (LTIMINDTREE) | FULL STACK JAVA DEVELOPER (INTERN)

Mar 2022 – Jun 2022 | India

- Built web application module using Java, Spring Boot, and React.JS with RBAC, improving data retrieval speed by 20%.

PROJECTS

MCP SERVER IMPLEMENTATION | GITHUB

Python, Anthropic Protocol, AI Agents

- Built MCP servers enabling secure two-way data connections between AI tools and enterprise data sources; reduced LLM hallucinations by 30%.

AI AGENT TOOLKIT | GITHUB

Autogen, LangChain, Multi-Agent Systems

- Contributed to open-source AI agent frameworks (Autogen/Microsoft Research); built multi-agent prototypes reducing manual task handoffs by 40%.
